DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 32, 43 and 44, drawn to a magneto-optical recording medium and a nominal method of using a magneto-optical recording medium, classified in class 428, subclass 694+.
 - II. Claims 33 - 42, drawn to a method of making a magneto-optical recording medium with specified pressures and deposition rates, classified in class 417, subclass 127+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as under atmospheric pressure or where an already formed recording layer is laminated onto an already formed underlayer (e.g. in a magneto-optic tape, etc).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1773

4. In addition, the Examiner notes that ***should applicants elect Group 1***, this group contains claims directed to the following patentably distinct species of the claimed invention:

Species Group A – wherein the first underlayer is {magnetic or non-magnetic} and

Species Group B – wherein the second underlayer is {magnetic or non-magnetic}.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species **FROM EACH SPECIE GROUP** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. For example, a proper election would be the election of “magnetic” for species group A and “non-magnetic” for species group B. Currently, claims 1, 2, 5 – 24 ,27 – 32, 43 and 44 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1773

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. No telephone call was made to applicants due to the complexity of the restriction requirement. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
